

Jay Wu (武文杰)

AI Native Full-Stack Builder · Independent Product Developer

📞 +86 132 6027 2080 | ✉️ w2jmoe@gmail.com | 🖥️ github.com/w2jmoe | 🌐 x.com/w2jmoe

Summary

2 years shipping 8 AI products from 0 to 1, owning the full loop: **insight** → **design** → **build** → **launch** → **validate** → **iterate or kill**. Daily power-user of Cursor, Claude, and GPT for development. Proven ability to turn hypotheses into validated products at minimal cost and high speed. **Seeking an early-stage AI team with strong product direction and growth potential as an AI Product Engineer or Founding Engineer.**

Core Strengths

Strength	Evidence
End-to-end ownership	8 products shipped solo: research, design, full-stack dev, deployment, validation, and sunset decisions
AI-native development	Daily development via Cursor/Claude/GPT; deep experience with Agents, MCP, Tool Calling, and AI workflows
Rapid validation	Average 2–4 week MVP-to-validation cycles; fast go/no-go decision-making to avoid sunk costs
Full-stack delivery	Next.js · TypeScript · Node.js · Python · MongoDB · Supabase —shipping complete products with zero handoffs

Projects

ANS — AI Work Simulation & Assessment Platform (2026)

Solo designed and built / [Demo](#) · [GitHub](#)

Built an AI Work Simulation platform evaluating how candidates define problems, collaborate with AI, exercise judgment, execute, and iterate — the five dimensions of AI-native work capability.

- Delivered full product loop: scenario design → candidate task completion → LLM evaluation → AI Work Profile → shareable report
- Architected extensible task framework supporting multiple roles (Product Growth, Customer Support, Research Agent)
- Stack:** Next.js 16 (App Router) · React 19 · TypeScript · Tailwind CSS 4 · 302.AI (OpenAI-compatible) · Supabase · Vercel

Wish Weaver — WeChat Mini Program for Relationship Care (2025)

Solo built and operated

Designed a low-pressure, high-transparency approach to caring for important people. Built end-to-end including WeChat Pay integration.

- **260+ users | 17.24% retention rate | ¥150+ revenue**
 - Validated willingness to pay and user stickiness in social-care scenarios
-

WisePick API — Agent Tool Routing Service (2026)

Open-source project / [GitHub](#)

Tool decision routing for AI Agents, reducing trial-and-error by selecting optimal capability paths.

- **17 GitHub stars | 177 ECU recommendation calls served**
 - Owned product design, full-stack development, deployment, and community maintenance
-

TimeLoop — AI Smart Wearable Voice Interface (2025)

Solo product design and prototype development

An AI-powered wrist-worn device enabling one-sentence automation of mobile app actions (e.g., voice-activated food ordering).

- **640 backers interested | ¥1,398 crowdfunded**
 - Independently designed hardware prototype, voice interaction logic, automation flows, and crowd-funding campaign
 - Validated user interest in AI + hardware scenarios; halted at prototype due to funding shortfall
-

Experience

Independent Product Developer / Solo Founder (2024 – Present)

Shipped **8 products** from zero to live, spanning AI assessment, Agent infrastructure, tool decision platforms, social care, and smart wearables.

Owned the full loop: **User Research → Product Definition → Full-Stack Development → DevOps → Data Validation → Business Judgment**

Core methodology: validate hypotheses within 2–4 weeks at minimal cost; sunset quickly when metrics don't support continuation.

Technical Skills

Development: Next.js · React · TypeScript · Node.js · Python · MongoDB · Supabase · REST APIs · WeChat Mini Programs

AI & Tools: Cursor · Claude · GPT · Agent Frameworks · MCP · Tool Calling · AI Workflows · LLM API Integration

DevOps: Vercel · GitHub Actions · CI/CD

Languages & Collaboration

- **Chinese:** Native; primary language for product design and user communication
 - **English:** Proficient in technical document reading and basic professional communication; adapts quickly to full collaboration with a brief transition period; strong cultural immersion via film and music
-

Education

Beijing City University · Film & TV Photography and Production (2012 – 2015)

What I'm Looking For

- **Target roles:** AI Product Engineer · Founding Engineer · Full-Stack AI Engineer (IC)
- **Ideal team:** Early-stage AI startup with strong product direction and high growth potential (YC-backed preferred)
- **Work mode:** Remote · onsite · relocate — all acceptable; willing to cooperate on visa sponsorship
- **Must-have:** High autonomy, results-oriented culture, AI-first collaboration, and a clear path to revenue
